EDUCATION

University of Washington

Bachelor of Science in Computer Engineering; Minor in Mathematics

Seattle, WA

Sept. 2023 – Jun. 2026

EXPERIENCE

Systems Team Consultant

Jan. 2024 – Jun. 2026

University of Washington, Seattle, WA

- Administered and supported 1,000+ macOS and 500+ Windows systems across campus, ensuring optimal uptime and system reliability.
- Developed and deployed a Linux lab environment utilizing Bash scripting and Active Directory, establishing a new university-wide standard adopted into the official IT handbook.
- Contributed to sprint planning and infrastructure migrations within an Agile framework, enhancing system reliability and ensuring seamless service continuity for 1,500+ campus devices.
- Diagnosed and resolved complex technical issues, utilizing asset and ticket data to optimize system performance across distributed workstations.
- Trained new team members on a variety of computer management tools, including but not limited to JAMF, MDT, Request-Tracker, and ServiceNow

Teaching Assistant — Fundamentals of Computer Science II

Mar. 2023 – Jun. 2023

Bellevue College, Bellevue, WA

- Facilitated weekly virtual labs and office hours for 36 students, breaking down complex concepts like recursion, inheritance, and polymorphism into accessible lessons.
- Guided the design and implementation of efficient data structures, emphasizing time and space complexity analysis ($O(n)$) for searching and sorting algorithms.
- Provided constructive code reviews on student projects, helping improve their algorithmic thinking, code readability, and runtime performance.

PROJECTS

Desert Mouse — Wave Survival Shooter | *Unity, C#*

- Designed a wave-based scaling and spawning system tied to combat completion.
- Engineered a dynamic path-finding system for enemies, combining linear motion and A* paths with no frame-time impact.
- Developed a custom UI rendering pipeline to maintain game theme with no impact to render times.
- Built a world-generation pipeline to procedurally create a world with obstacles and rewards using a pooled object-recycling architecture.

DUET — Social Music Networking App | *Dart, Flutter, Firebase (Auth, Firestore, Messaging), Spotify API*

- Led a team using Agile methodologies, facilitating weekly sprint planning and stand-up sessions to coordinate feature development.
- Developed a web app that analyzes Spotify API data to match users based on musical compatibility and listening habits.
- Engineered a real-time messaging system using Firestore, ensuring low-latency communication and synchronized data states across clients.
- Architected a scalable backend using Firebase Auth and Firestore, implementing secure user data handling and efficient query structures.

TECHNICAL SKILLS

Languages: Python, Java, C#, C++, JavaScript, TypeScript, SQL, HTML, CSS, Dart

Frameworks & Libraries: React, Next.js, Node.js, Express.js, FastAPI, Flutter, PyTorch, NumPy, Pandas, JUnit, Unity, Tailwind CSS

Databases: Neo4j (Graph), PostgreSQL, MySQL, SQLite, Firebase Firestore

Cloud & DevOps: Microsoft Azure, Vercel, Docker, GitHub Actions, CI/CD, Linux, Bash, PowerShell

Developer Tools: Git (GitHub, GitLab), Clerk Auth, Jamf, Maven, GDB, VS Code, Jira, Postman

Additional Skills: RESTful APIs, GraphQL, WebSockets, Agile Methodologies, Web Security (XSS/CSRF), Data Structures & Algorithms, Figma
